## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/17/07 has been entered.

### ***Claim Objections***

2. Claim 8 is objected to because of the following informalities: "claims 9-19" in page 3 should be -- claims 8-19 --. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Agre, US Pat 5,978,679 in view of Anderson et al, US Pat 6,088,590.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Agre, US Pat 5,978,679 in view of Anderson et al, US Pat 6,088,590.

**Claim 3:** Agre discloses a mobile communication system including first Base Stations operating over a first system interface and second Base Stations operating over a second system interface (reads location area), and a Mobile Station camped on a cell in the first group, including receiving signals over the second interface from the second Base Station, evaluating characteristics of the signals, and in response thereto, selecting the second Base Station and camping on the second Base Station (col. 3 line 28-col. 4 line 38, col. 5 lines 12-44); wherein the evaluating characteristics of the signals comprises applying a CDMA a path-loss criteria to the signals (i.e., read on signal strength causes handover after a given amount of loss in the signal strength, col. 8, lines 23-65).

Agre fails to disclose that the Mobile Station performs every step, rather Agre states that the system makes the decision.

Anderson discloses the utility of allowing the Mobile Station to make the handover decision in a handover method such as that taught by Agre (col 2 lines 3-38, col 15 lines 47-67). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to add such a feature to Agre as it would shorten handoffs, see Anderson col 17 lines 45-62.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 2617

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 7, 20, 21, 22, 28, 52-54, and 60 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 7,092,716. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the US patent encompass or are broader than the claims in the current application.

#### ***Allowable Subject Matter***

8. Claims 7, 20, 21, 22, 28, 52-54, and 60 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
